WORK EXPERIENCE

Islamic University Of Gaza (IUG) - Gaza, Palestine

Sep 2018 - May 2019

Teacher Assistant

Materials: DSP/ Communications I/ Probability / Electromagnetics / PIC / Digital Electronics.

Founders Programme - Gaza, Palestine

June 2019

The Founders Programme is a joint initiative between Gaza Sky Geeks and Founders and Coders in which a pair of Gazan Code Academy graduates work remotely with a pair of London developers to build an MVP for a UK-based client.

Business-Launchpad - Business Launchpad aims to support young entrepreneurs (16-30) through running free workshops and mentoring sessions with groups and individuals. This tool saves, views, and checks off goals related to business journeys, particularly when used in conjunction with BL mentors. It also offers the capacity to record reflections upon completing goals.

Technologies used: Airtable /React Js/MongoDB/ Express.js.

Gaza Sky Geeks Code Academy - Gaza, Palestine

Jul - Dec 2018

Full Stack JavaScript Developer

The GSG Code Academy is Palestine's first immersive, 6-month career accelerating web development bootcamp.

Projects built during the course:

Chat-it-out

A website that targets Gazan people with psychological concerns and issues and offers a selection of psychological articles on a myriad of mental issues in a simple language for the users to browse.

Technologies used: PostgreSQL / Express.js/socket.io.

Qattan-Foundation -

A website built for the Qattan Foundation that enables the employee to send a technical support request to the IT department. The IT department can then mark the status of the support request.

Technologies used: PostgreSQL / Express.js.

CHariZone

Charizone is a platform where UK-based charities can post their profiles with the aim of presenting their information and data to facilitate the process of browsing charities and making donations easier and faster for the user.

Technologies used: Airtable /React Js/ Express.js.
