EDUCATION

computer engineering
october 6 university
excellent 85.06%

october 2000 — july 2000

INTERESTS

First let me introduce myself , my name is Yasmin Nassar , i am a computer engineer , spent my last years trying to get employed in the government careers , and obviously my plan did not work . so i tried another way a new vision about what i got do the rest of my life , that when i heard about E-marketing and freelancers which were very new , very outstanding concepts . 7 months ago i got my 45 hours course E-marketing , learning about seo , onpage seo, offpage seo ,marketing plans , persona , email marketing , affiliate , drop shipping and many others. i learnt how to be a social media manager creating pages and manage them , youtube channel and manage it . and the most i loved is how to create a blog or a website using blogger or wordpress. I am really interested in books in general , words particular , in my beliefs words is the most powerful thing in the world , so I love to pick some quotes of novels I have read and put in a design , that doesn't mean I am a graphic design , no not at all , but I make a lovely posts and photos using CANAVA . AS a data entry ,my typing speed is good and I am working to make it better with high level of accuracy. I got ICDL course learning microsoft word , powerpoint , excel , and access. Finished Oracle 11g Sql / Plsql programming . Learned C , C# , C++ languages to program with . I took a quick look to HTML , python languages . I can do some English /Arabic translation. Learning some editing videos by Filmora.
