

Hi all! My name is Aseel and I have a BA in multimedia. I'm a graphic designer who specializes in logo and comic and magazine design. I am experienced in adobe Photoshop, illustrator, aftereffects, indesign, 3dmax, and i experience in digital marketing and social media marketing and in adobe programmes like premier, to make social media videos to marketing products . I like drawing and sketching logo concepts then making and experimenting with them via illustrator. I'm very flexible and communicative. The most important part I believe in freelancing is understanding the clients' needs perfectly in order to best deliver and make their imaginary concept a reality. I love drawing and coming up with new concepts and lines and I would love to talk with you if you are unsure about what you want. I trust I can deliver a client's request satisfactorily. Don't hesitate to contact me for any question or sample. I'm free to accept work at any time and I can't wait to work and share my experience with you.
