SUMMARY

Say welcome to creativity!

Not until I topped in the design competition in school did I find myself in the field of graphic design. It all started when my friend and I decided to learn on the Adobe Photoshop Program. Since then, I got obsessed with graphic design that I directed my eye to every advertisement I saw in streets or on TV. I began to think how I could possibly mimic that, until I finally reached a level where I could criticize some designs.

Now I am a highly skilled graphic designer with 3+ years of experience in branding, logo & company identity design, and social media design. I've worked on 16+ brand creation projects. I can deal with Adobe Photoshop, Adobe Illustrator, Sketch, Adobe XD, and Adobe Premiere. My works follow the latest design trends; they'll definitely step up your brand to the next level.

I am infatuated with photography and I have already learnt its basics. I often spend my free time capturing good photos I share here on my 500px gallery: <https://500px.com/ham2008oody>

I love learning new recipes and I sometimes try to cook. I always think to myself that if I wasn't a graphic designer, I would be a chef.

If you crave elegant designs with a high quality delivered in a short time, then you would love working with me. Feel free to contact me.
